

OMNICAD TECH AND SPECS

Comprehensive and configurable, OmniCAD is designed to assist PSAPs with rapid response to any incident type and facilitate the most effective coordination of resources across geography at a given time. Incidents and resources are displayed side-by-side in real time for easy viewing and superior workflows. Dispatchers process critical data and alert first responders within moments.

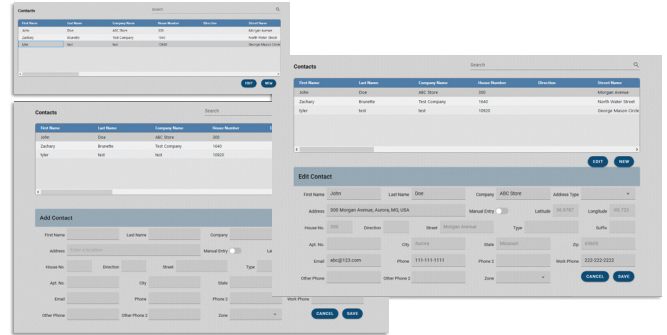

Simplified incident handling

Filter incidents by type to arrange active calls by priority. Create alerts and assign incidents with a single button click for efficient incident handling.

Efficient resource monitoring and dispatching

Integrated display shows the status and location of all resources available to the PSAP for dispatching purposes.

OMNICAD BENEFITS

Easy Access

- Web-based system requires only a browser and network access.
- Optional Command Line entry for dispatching.
- Integration with ProQA for advanced scripting functionality.

Intuitive User Interface

- Full customizable screen layout.
- One-button access to commonly used incident handling functions.
- Display incident activity visually using an integrated, fully compliant GIS mapping system.

CERTIFICATIONS, COMPLIANCE & TESTING

- JITC Certified for DoD Deployments
- Validated to operate with standard ESInet environments including AT&T, Intrado, INdigital, Synergem, NGA 911, and others
- NENA i3 Compliant
- TELCORDIA Compliance Tested (NENA SPECIFICATIONS)
- Tested and Proven Functional at NENA ICE
- Compatible within Legacy E-911 environments

Other Offerings in the Omni911 Suite

- **Omni911 Call Handling** – Proven, software-based call handling application that integrates with existing PSAP infrastructure to provide Next Generation 9-1-1, advanced communications and command & control functions.
- **OmniMap** – Accurate, integrated mapping system that assists with call routing and delivers location information that is easily shared with dispatchers and first responders.
- **OmniCAD Mobile** – Leverages the full potential of CAD with Internet and Mobile for first responders.
